

DELUXE SHOWER/TOILET TENT

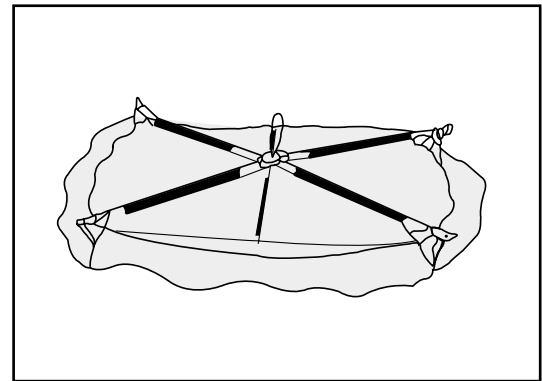

MODEL 10820A

TO SET UP:

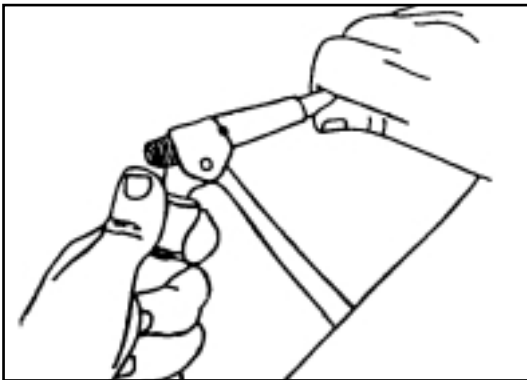

Please make sure you read and understand the following instructions before you set up this tent. The poles for this tent are already threaded through the sleeves on the tent. Please do not use unnecessary force on the poles or the tent fabric when erecting tent.

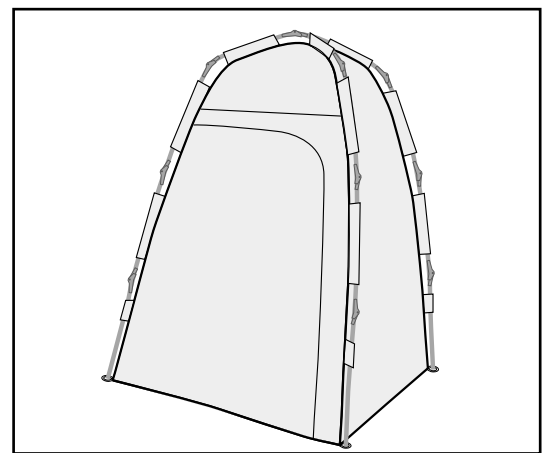

1. Begin by holding the folded tent in a vertical position and allow the poles to hinge down to expose a black disk shaped joint.

2. With the lanyard attached to the disk lift the tent and shake gently until all four poles hang down.

3. Hold the top section of the first pole and lift the section below it to lock it into position with the sliding plastic collar.

4. Continue locking all four top sections together and then repeat to lock lower four sections. Peg out guy ropes and tension to make frame stable.

TO DISASSEMBLE:

By sliding down the plastic collar on each connector the pole connections can be unlocked and the tent folded and packed into its carry case.
